Education

Vishwakarma Institute of Information Technology, Pune **Aug. 2023 – Present**
Bachelor of Technology in Artificial Intelligence and Data Science *CGPA [8.64]*

Brilliant Academy and Jr College of Science **Jun. 2020 – Mar. 2022**
Karad, Maharashtra *HSC Board [83%]*

Adarsh Vidya Mandir, Wing **Apr. 2019 – May 2020**
Karad, Maharashtra *SSC Board [93.60%]*

Technical Skills

Databases & SQL: MySQL, MongoDB, SQL, Relational Database Concepts, Database Schema, Query Validation
Programming Languages: C++, JavaScript, Python
Backend & APIs: Node.js, Express.js, REST APIs, FastAPI, API Testing with Postman
AI & Retrieval: LangChain, Retrieval-Augmented Generation (RAG), Semantic Retrieval, Gemini API
Core Concepts: DBMS, Object-Oriented Programming, Data Structures and Algorithms, Debugging, Error Handling
Developer Tools: Git, GitHub, VS Code, Postman

Projects

RAG-Based Text-to-SQL Chatbot | *MySQL, Gemini API, LangChain*

- Architected an end-to-end Text-to-SQL pipeline using LangChain and Gemini API to translate complex multi-table analytical questions into valid MySQL queries.
- Optimized prompt context window by dynamically injecting relevant schema definitions, foreign key relationships, and sample few-shot query pairs, boosting first-pass SQL generation accuracy.
- Hardened database security via query validation and strict read-only execution permissions, preventing destructive SQL injection and unauthorized data modification.
  resumeItem Engineered automated query repair and explainability loops, analyzing execution errors to self-correct failed queries and translating raw result sets into concise natural language summaries.

RAG-Based Knowledge Assistant | *React.js, Node.js, Express.js, MySQL, LangChain*

- Built a full-stack RAG assistant using React.js and Node.js/Express, providing grounded answers over enterprise documents with optimized retrieval latency.
- Implemented semantic document retrieval using LangChain, chunking and indexing unstructured documents to reduce model hallucinations and improve response accuracy.
- Designed relational data models in MySQL to persist multi-tenant conversation histories, user feedback, and document citation metadata.
- Developed resilient REST API endpoints to handle chat requests, incorporating optimized response generation for heavy LLM workloads.

Achievements & Certifications

- Earned a **4-star SQL badge** on HackerRank.
- Completed the **IBM Back-End Development Professional Certificate** on Coursera. Certificate
- Solved **200+ Data Structures and Algorithms problems** on LeetCode and GeeksforGeeks.
- Selected as a **Smart India Hackathon (SIH) 2025 nominee**.
- Completed **Basic Coding in C++** certification on Unstop.
- Represented at the **regional level** in Kabaddi.
